Summary: The entire LENO box was surveyed under green conditions today requiring two flights with a fuel stop in Meridian, MS.

Issues/Concerns: None

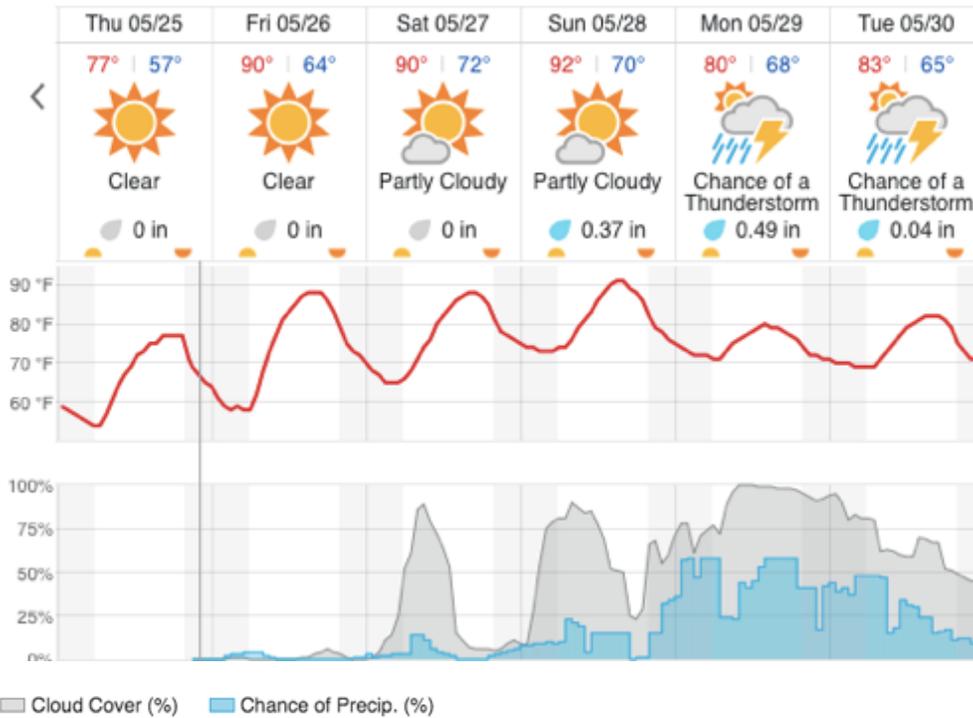

Comments: The plan was to survey the Flyority 2 area, DELA, if green conditions were present. Upon arriving at DELA, it was determined that cloud cover was too heavy to facilitate flying DELA. Fortunately, further to the south green conditions occurred after a number of lines were flown under yellow conditions at LENO. With weather clearing in the LENO area, it was possible to complete the entire box under ideal conditions. Upon flying north towards KBHM, it was found that yellow conditions remained near DELA throughout the day.
