GPS Instrument: NONE

Summary:
No flights were flown today. Low cumulus clouds were reported and observed in the vicinity of RMNP for most of the morning into the afternoon. Isolated thunderstorms also moved throughout the area.

Issues/Concerns:
- The NIS errors, which were reported last week, appear to be resolved. Special thanks to the AOP Scientist and ASOs who worked feverishly to detect and resolve the issue!

Comments:
- GPS 05 (RMNP) battery changed and modem unplugged due to poor cellular reception.
- Abe Morrison will fly to D02 tomorrow for FBO recon
- We are still awaiting permission to fly the “Flyority 1” RMNP flight Box that includes areas inside the national park. We expect to receive notification this week.
