### **Summary:**

Rain across the region prevented flights today.

### **Issues/Concerns:**

-After concerns that we would be unable to generate the SBET for two already completed flights, we learned that on long transits (both flights in question had 40 min+ transits) that there are sometimes processing errors in the beginning. Bridget was able to manually generate the SBET by starting the process after that error.

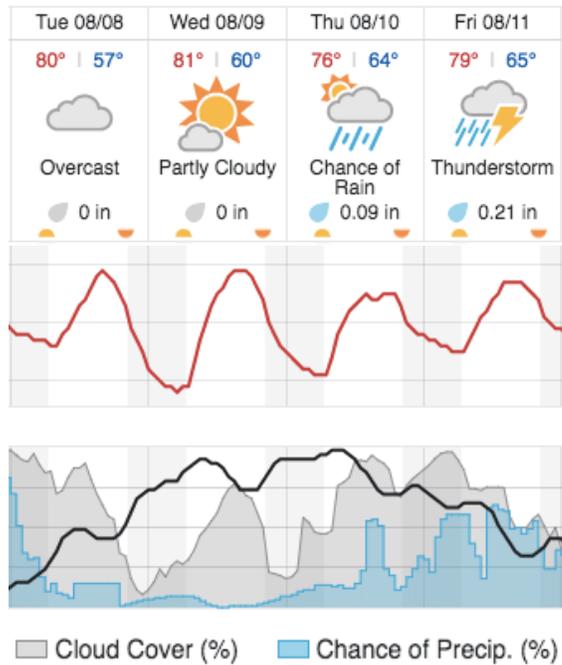

-Camera banding issue is still present. No new information at this time.

None.
