Summary: With weather forecasted to be cloudy for today and a serious backup of data extraction to be done, no flights were conducted today, but three disk sets have been extracted.

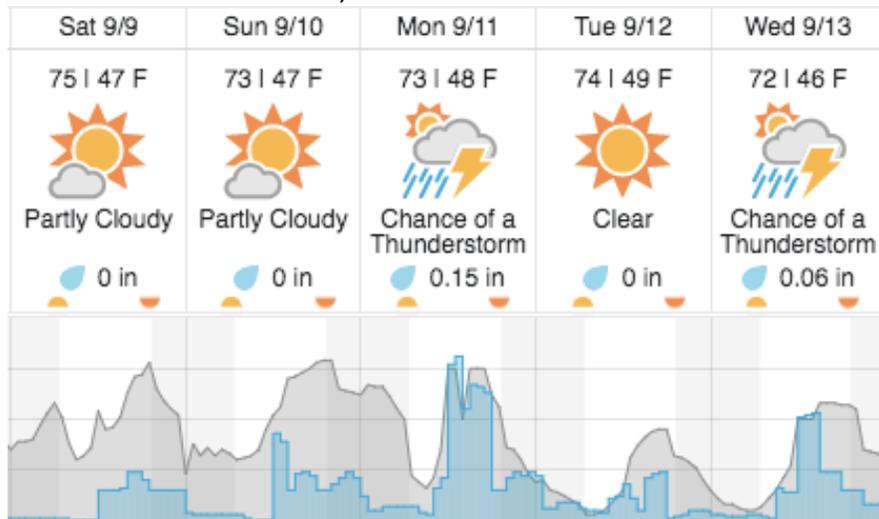

Issues/Concerns: We are using the spare hotel kit to extract as Hotel Kit 2 is not functioning properly. The QA/QC is not running on the Spare Hotel kit, but data is successfully being extracted from the disks. A game plan for QA will be discussed next week.

Comments: Tomorrow is a crew rest day.
