Summary

The crew attempted a flight with the promise of a couple of hours of decent weather, but was turned back by building clouds at all sites.

Concerns

The UPS 3000 isn't charging the top bank of batteries properly. It is still functional, but requires a battery bank swap every couple of flights.

Comments

- The Replacement Sherpa UPS arrived today but the crew will hold off installation because the current one seems to be working again.
- The crew oxygen bottle and rack assembly was relocated today to aft of the lidar rack. This was done because the oxygen bottle rack was not allowing the battery bank in the UPS 3000 to be removed.
- The data from yesterdays functional check flight of the NIS did not identify any abnormalities so the system will once again be used for science collections.
- The pilots washed the Otter today, and it looks great!
