Summary

Potential for clear sky collection flights over Santa Rita this morning were cancelled after it was discovered that we had insufficient GPS coverage.

Concerns

- Data from GPS 09 (currently set up at Santa Rita) failed to upload last night, and crew was unable to connect to unit this morning. D14 staff in the field at Santa Rita were able to put eyes on the unit, and confirmed the unit was off. After checking connections, the unit powered back on its own, and appeared to be charging. However, later in the day, it was observed that the unit was no longer online. Current theory is either a faulty battery or solar panel. Ivana Vu will drive to SRER tomorrow morning with spares of both in hopes to troubleshoot. Crew will plan on awaiting word from Ivana before starting SRER collect. New permanent SRER GPS receiver is scheduled to arrive Wednesday morning, and will be installed later that day.
- Aircraft cabin temperature continue to rise above acceptable levels inside hangar.

Comments

- Cameron Chapman arrived in Phoenix this afternoon to join the P2 crew. Welcome back, Cam!
- Special thanks to D14 staffers Amanda Wilcox-Waller & Katie Goodwin in troubleshooting today.
- Search for a viable GPS location at SYCA is still in progress.
