Summary
Today's forecast called for clear skies and cooler temps. The skies today unfortunately yielded very high very thin cirrus clouds that covered most of the sky. The decision was made to collect the OAES site under “red” sky conditions due to the forecast for the rest of our stay in D11 being unfavorable for that site. 27 lines were collected.

Concerns
-Heat continues to be a concern, although today was much cooler. An additional air cond unit arrived here today and will be used as the temps rise back up again in the next couple of days.

Comments
-The vac pump was shipped to Fairbanks AK today and should arrive in a couple of days.
